

creekto coral

our waterways-our responsibility

Creek to Coral is a joint initiative of Townsville City Council, Thuringowa City Council, Citiwater and the EPA to heighten public awareness and protect the quality of North Queensland waterways.

The Creek to Coral project is about the sustainable use and management of our coastal marine and freshwater environments.

The Creek to Coral focus is on local concerns and issues in an environmental context that is relevant to the Townsville and Thuringowa dry tropics adjacent to the Great Barrier Reef.

Creek to Corals' structure includes
4 working groups:

- 1 Infrastructure Working Group
- 2 Community Education involvement and Monitoring Working Group
- 3 Water Quality Monitoring and Research Working Group
- 4 Environmental Protection and Emergency Response Working Group
